Contents

Volume 154 Number 1 April 2002

CONTENTS

Forum

Commentary

1 Hydrophobins in the lichen symbiosis • An orchid–fungus marriage – physical promiscuity, conflict and cheating

Letters

7 Does hairiness matter in Harare? Resolving controversy in global comparisons of plant trait responses to ecosystem disturbance

Meetings

10 Atmospheric CO_2, climate and evolution – lessons from the past

Books

13 Protocols for plant cell biologists • An accessible route to modern plant science?

Review

Tansley reviews

15 Evolutionary dynamics of grass genomes
B. S. Gaut

29 Arsenic uptake and metabolism in arsenic resistant and nonresistant plant species
A. A. Meharg & J. Hartley-Whitaker

Research

45 Membrane depolarization induces K^+ efflux from subapical maize root segments
F. F. Nocito, G. A. Sacchi & M. Cocucci

53 How can we predict the effects of elevated CO_2 on the balance between perennial C_3 grass species competing for light?
F. Teyssonneyre, C. Picon-Cochard & J. F. Soussana

65 Elevated CO_2 increases carbon allocation to the roots of *Lolium perenne* under free-air CO_2 enrichment but not in a controlled environment
D. Suter, M. Frehner, B. U. Fischer, J. Nösberger & A. Lüscher

77 Sucrose-phosphate synthase activity in mature rice leaves following changes in growth CO_2 is unrelated to sucrose pool size
R. W. Gesch, J. C. V. Vu, K. J. Boote, L. H. Allen Jr & G. Bowes

85 Soluble nonprotein nitrogen compounds indicate changes in the nitrogen status of beech seedlings due to climate and thinning
M. N. Fotelli, M. Nahm, A. Heidenfelder, H. Papen, H. Rennenberg & A. Geßler

99 Do mature leaves provide a net source of nitrogen supporting shoot growth in *Rhododendron ferrugineum*?
F. Pasche, A. Pornon & T. Lamaze

107 Long-term exposure to enhanced UV-B radiation is not detrimental to growth and photosynthesis in Douglas-fir
J. H. Bassman, G. E. Edwards & R. Robberecht

121 Fe-deficiency increases Cu acquisition by wheat cropped in a Cu-contaminated vineyard soil
V. Chaignon, D. Di Malta & P. Hinsinger

131 *Herbaspirillum* colonization increases growth and nitrogen accumulation in aluminium-tolerant rice varieties
P. Gyaneshwar, E. K. James, P. M. Reddy & J. K. Ladha

147 Leaf traits as indicators of resource-use strategy in floras with succulent species
F. Vendramini, S. Díaz, D. E. Gurvich, P. J. Wilson, K. Thompson & J. G. Hodgson

159 Novel features of *Equisetum arvense* spermatozoids: insights into pteridophyte evolution
K. S. Renzaglia, S. B. Dengate, S. J. Schmitt & J. G. Duckett

175 Characterization and expression of *XPH1*, the hydrophobin gene of the lichen-forming ascomycete *Xanthoria parietina*
S. Scherrer, A. Haisch & R. Honegger

185 Differential expression of hydrophobins *DGH1*, *DGH2* and *DGH3* and immunolocalization of DGH1 in strata of the lichenized basidocarp of *Dictyonema glabratum*
M. L. Trembley, C. Ringli & R. Honegger
• **Commentary p. 1**

197 NMR imaging as a tool for noninvasive taxonomy: comparison of female cones of two Podocarpaceae
S. M. Glidewell, M. Möller, G. Duncan, R. R. Mill, D. Masson & B. Williamson

209 Arbuscular mycorrhizas influence plant diversity and community structure in a semiarid herbland
P. J. O'Connor, S. E. Smith & F. A. Smith

219 Ectomycorrhizal fungal taxa differing in response to nitrogen deposition also differ in pure culture organic nitrogen use and natural abundance of nitrogen isotopes
E. A. Lilleskov, E. A. Hobbie & T. J. Fahey

233 Symbiotic germination and development of the myco-heterotrophic orchid *Neottia nidus-avis* in nature and its requirement for locally distributed *Sebacina* spp.
S. L. McKendrick, J. R. Leake, D. Lee Taylor & D. J. Read
• **Commentary p. 4**

249 Flow cytometric analysis of cellulose tracks development of embryogenic *Brassica* cells in microspore cultures
D. Schulze & K. P. Pauls

255 Mycorrhizal infection and high soil phosphorus improve vegetative growth and the female and male functions in tomato
J. L. Poulton, D. Bryla, R. T. Koide & A. G. Stephenson

265 Corrigendum

Volume 154 Number 2 May 2002

CONTENTS

Forum

Commentary

267 Fine roots of trees – a new perspective

Books

271 Rushing toward a phylogenetic future • Biological webs of plant disease

Review

Tansley reviews

275 Coevolution of roots and mycorrhizas of land plants
M. C. Brundrett

305 Biology of mycorrhizal associations of epacrids (Ericaceae)
J. W. G. Cairney & A. E. Ashford

Research

Rapid reports

327 Elevated atmospheric CO_2 causes seasonal changes in carbonyl emissions from *Quercus ilex*
J. Kreuzwieser, C. Cojocariu, V. Jüssen & H. Rennenberg

Full papers

335 Comparative responses to water stress in stay-green, rapid- and slow senescing genotypes of the biomass crop, *Miscanthus*
J. C. Clifton-Brown, I. Lewandowski, F. Bangerth & M. B. Jones

347 Location of (1 → 3)- and (1 → 3),(1 → 4)-β-D-glucans in vegetative cell walls of barley (*Hordeum vulgare*) using immunogold labelling
J. A. K. Trethewey & P. J. Harris

359 Within-stem variation of respiration in *Pseudotsuga menziesii* (Douglas-fir) trees
M. L. Pruyn, B. L. Gartner & M. E. Harmon

373 Identification of drought-sensitive beech ecotypes by physiological parameters
A. D. Peuke, C. Schraml, W. Hartung & H. Rennenberg

389 Below-ground carbon input to soil is controlled by nutrient availability and fine root dynamics in loblolly pine
J. S. King, T. J. Albaugh, H. L. Allen, M. Buford, B. R. Strain & P. Dougherty
• **Commentary p. 267**

399 Toughness is less important than chemical composition of *Arbutus* leaves in food selection by *Poecilimon* species
M. Kouki & Y. Manetas

409 Are competitive interactions influenced by spatial nutrient heterogeneity and root foraging behavior?
K. M. Bliss, R. H. Jones, R. J. Mitchell & P. P. Mou

419 Multiple introductions from the Iberian peninsula are responsible for the invasion of *Crupina vulgaris* in western North America
T. Garnatje, R. Vilatersana, C. T. Roché, N. Garcia-Jacas, A. Susanna & D. C. Thill

429 Is *Rafflesia* an endothermic flower?
S. Patiño, T. Aalto, A. A. Edwards & J. Grace

439 Closely related MADS-box genes in club moss (*Lycopodium*) show broad expression patterns and are structurally similar to, but phylogenetically distinct from, typical seed plant MADS-box genes
M. E. Svensson & P. Engström

451 Gluthione status correlates with different degrees of desiccation tolerance in three lichens
I. Kranner

461 Limitations to photosynthesis in tomato leaves induced by *Fusarium* wilt
S. Nogués, L. Cotxarrera, L. Alegre & M. I. Trillas

471 Autophagocytosis of carotenoid-rich lipid droplets into vacuoles during aeciospore ageing in *Puccinia distincta*
R. W. S. Weber & P. Davoli

481 Large-leaved lime (*Tilia platyphyllos*) has a low ability to compartmentalize decay fungi via reaction zone formation
S. Baum & F. W. M. R. Schwarze

491 Colonization of plant roots by egg-parasitic and nematode-trapping fungi
J. J. Bordallo, L. V. Lopez-Llorca, H.-B. Jansson, J. Salinas, L. Persmark & L. Asensio

501 Hormone concentrations in tobacco roots change during arbuscular mycorrhizal colonization with *Glomus intraradices*
O. Shaul-Keinan, V. Gadkar, I. Ginzberg, J. M. Grünzweig, I. Chet, Y. Elad, S. Wininger, E. Belausov, Y. Eshed, N. Atzmon, Y. Ben-Tal & Y. Kapulnik

509 Differential NO_3^- dependent patterns of NO_3^- uptake in *Pinus pinaster, Rhizopogon roseolus* and their ectomycorrhizal association
A. Gobert & C. Plassard

517 Differential expression of a malate synthase gene during the preinfection stage of symbiosis in the ectomycorrhizal fungus *Laccaria bicolor*
S. Balasubramanian, S.-J. Kim & G. K. Podila

529 Subterranean community structure of ectomycorrhizal fungi under *Suillus grevillei* sporocarps in a *Larix kaempferi* forest
Z. Zhou & T. Hogetsu

Volume 154 Number 3 June 2002

CONTENTS

Forum

Commentary

541 Signaling in mycorrhizal symbioses – elegant mutants lead the way • Tubular vacuoles in arbuscular mycorrhizas

Books

548 Popular trees, specialist trees • A new critical starting point for Antarctic lichen taxonomy

Review

Tansley reviews

553 The cell biology of phytochrome signalling
S. G. Møller, P. J. Ingles & G. C. Whitelam

591 What has QTL mapping taught us about plant domestication?
A. H. Paterson

Research

609 Canopy position affects the temperature response of leaf respiration in *Populus deltoides*
K. L. Griffin, M. Turnbull & R. Murthy

621 O_3 uptake and drought stress effects on carbon acquisition of ponderosa pine in natural stands
N. E. Grulke, H. K. Preisler, C. Rose, J. Kirsch & L. Balduman

633 Compression wood has little impact on the water relations of Douglas-fir (*Pseudotsuga menziesii*) seedlings despite a large effect on shoot hydraulic properties
R. Spicer & B. L. Gartner

641 Variations in ageing and meristematic activity in relation to flower-bud and fruit excision in the *Beta* species complex
N.-C. Hautekèete, Y. Piquot & H. Van Dijk

651 *Cenococcum geophilum* populations show a high degree of genetic diversity in beech forests
J.-L. Jany, J. Garbaye & F. Martin

661 Reproduction and offspring competitiveness of *Senna obtusifolia* are influenced by nutrient availability
K. D. Tungate, D. J. Susko & T. W. Rufty

671 Light-dependent growth rate determines changes in the population of *Planktothrix rubescens* over the annual cycle in Lake Zürich, Switzerland
A. E. Walsby & F. Schanz

689 The advantage of early flowering in the spring ephemeral annual plant *Floerkea proserpinacoides*
G. Houle

695 Vernalization response of wild chickpea
S. Abbo, S. Lev-Yadun & N. Galwey

703 Morphological responses of plant roots to heterogeneity of soil resources
M. Šmilauerová & P. Šmilauer

717 Insect-mediated reproduction of systemic infections by *Puccinia arrhenatheri* on *Berberis vulgaris*
A. Naef, B. A. Roy, R. Kaiser & R. Honegger

731 Composted recycled organic matter suppresses soil-borne diseases of field crops
E. L. Tilston, D. Pitt & A. C. Groenhof

741 Dual requirement of the *LjSym4* gene for mycorrhizal development in epidermal and cortical cells of *Lotus japonicus* roots
M. Novero, A. Faccio, A. Genre, J. Stougaard, K. J. Webb, L. Mulder, M. Parniske & P. Bonfante
• **Commentary p. 541**

751 Phosphorus uptake by arbuscular mycorrhizal hyphae does not increase when the host plant grows under atmospheric CO_2 enrichment
M. E. Gavito, D. Bruhn & I. Jakobsen

761 Extensive tubular vacuole system in an arbuscular mycorrhizal fungus, *Gigaspora margarita*
Y. Uetake, T. Kojima, T. Ezawa & M. Saito
• **Commentary p. 545**

769 Characterization of an *Aux/IAA* cDNA upregulated in *Pinus pinaster* roots in response to colonization by the ectomycorrhizal fungus *Hebeloma cylindrosporum*
V. Charvet-Candela, S. Hitchin, D. Ernst, H. Sandermann Jr, R. Marmeisse & G. Gay
• **Commentary p. 541**

779 Biochemical and molecular characterization of NADP-glutamate dehydrogenase from the ectomycorrhizal fungus *Tuber borchii*
L. Vallorani, E. Polidori, C. Sacconi, D. Agostini, R. Pierleoni, G. Piccoli, S. Zeppa & V. Stocchi

791 Extramatrical ectomycorrhizal mycelium contributes one-third of the microbial biomass and produces, together with associated roots, half the dissolved organic carbon in a forest soil
M. N. Högberg & P. Högberg

797 Phenology of roots and mycorrhiza in orchid species differing in phototrophic strategy
H. N. Rasmussen & D. F. Whigham

809 Phospho-imaging as a tool for visualization and noninvasive measurement of P transport dynamics in arbuscular mycorrhizas
J. S. Nielsen, E. J. Joner, S. Declerck, S. Olsson & I. Jakobsen

821 Biodegradation of linuron in a *Phaseolus* bioassay detected by chlorophyll fluorescence
K. Hulsen, E. M. Top & M. Höfte
